Summary

Hi there!

My name is Burhan, a dedicated Web Developer based in Pakistan. Currently, I'm a second-year student at the University Of Central Punjab, pursuing an Associate Degree in Computer Science. I plan to complete my Bachelor's degree in Computer Science at the same university.

With over two years of experience in web development, I specialize in HTML, CSS, Tailwind CSS, JavaScript, React.js, Node.js, Express.js, and MongoDB. My expertise includes creating and working with APIs. My portfolio boasts diverse projects such as portfolio websites, music apps, and weather apps. Additionally, I have foundational knowledge in DevOps and Git Version Control.

I'm always eager to connect with like-minded professionals and explore new opportunities to innovate in web development.

Best,

Burhan

Experience

Self-Initiated Project — **Oct 2023 - Present**
Full Stack Web Developer — Sheikhupura
https://olantrack.vercel.app/

Personal Project: Music Streaming App
Oct 2023 – Present

- Developed a music streaming web app using HTML, Tailwind CSS, and JS offering seamless music playback.
- We have implemented features like playlist creation, song search, and media controls.
- We have integrated third-party APIs to fetch music data and stream tracks.
- It ensured responsive design for optimal performance across mobile and desktop devices.

Self-Initiated Projects — **June 2023**
Front End Web Develpoer — Sheikhupura
https://burhanahmad.netlify.app/

Web Development Projects
Portfolio Website Development
June 2023

- Designed and developed a personal portfolio website using HTML, CSS, JavaScript, and React.
- Created a responsive, user-friendly interface to showcase web development services.
- Deployed the website using Netlify, ensuring fast loading speeds and mobile compatibility.

Self-Initiated Project — **Sep 2023 - Oct 2023**
Full Stack Web Developer — Punjab
https://weatherpunjab.netlify.app/

Personal Project: Weather Forecast App

Sep 2023 - Oct 2023

- Built a weather forecast application using HTML, CSS, JavaScript, and OpenWeather API.
- Displayed real-time weather data, including temperature, humidity, and forecasts based on user location.
- Implemented geolocation services to auto-detect the user's current location for convenience.
- Focused on a minimalist and responsive design, ensuring mobile and desktop compatibility.

Education

University Of Central Punjab — **Oct 2023 - Present**
